

# OCTOBER 23, 2019

## INNOVATING PERFORMANCE – THE HUMAN PERFORMANCE (HP) SEMINAR

Our introductory module in a new series of safety education seminars from Signal Mutual will focus on sharing **HP** concepts and principles. Each attendee will leave with knowledge of how to utilize **“Tools”** that, when used conscientiously, will help you discover and address human error events.

Understanding how errors trigger events will help you to figure out what efficient controls need to be put in place to avoid **“At-Risk Acts” (ARA)** from occurring.

Using **HP** tools up front to vet a process can systematically address operational steps within a task, which will lead to avoided injuries, rework, and downtime, all things we know drive up cost and disrupt schedules.

Mutually **WE** drive towards  
**“Member-Wide, Error-Free”**  
individually and collectively.

### Why WE Care

*Safety. Live It. Share It.*

Individual and Work Team Improvement;

Positively influence organizational processes and values;

Reinforce desired behaviors that reduce errors;

Facilitate open communication;

Achieving high levels of performance!

**Mansion On Forsyth Park, Autograph Collection**

700 Drayton Street  
Savannah, Ga 31401  
(Scheduled in conjunction with the Safety Committee Meetings)
